

◆ Automatic Ink Marking Unit Mini-Marker

The automatic marking unit Mini-Marker is designed for the integration in production- and test-applications.

The Mini-Marker provides reliable, low-cost ink marking with minimal maintenance and improved quality impressions.

- ✓ marking of non-porous surfaces (printed circuits boards, metals, films, glass, mylars)
- ✓ fast drying, self-inking inspection stamps
- ✓ easy integration and application
- ✓ sealed self capping for discontinuous operations
- ✓ three different print sizes (IM 106, IM 116)
- ✓ high quality rubber face moulded to any custom configuration
- ✓ quality marks with the spring loaded „kiss touch“ pressure sensitive print head
- ✓ 1000 marks per refill

Original dimensions

We mark it

Technical details:

Start signal	PLC or PC
Air pressure:	5-6 bar
Power supply:	24 DC, 0,5 A
Dimensions:	45x130x85 mm (LxHxW)
